Unable to Display the Login Banner. SSH version 2 supports the login banner. The login banner is displayed if the SSH client sends the username when it initiates the SSH session with the Cisco router.

Configuring Secure Shell on Routers and Switches Running ...

TRex is a Linux application, interacting with Linux kernel modules. It uses DPDK (there is no need to install DPDK as a library). TRex should work on any COTS x86 server (it can be compiled to ARM but not tested in our regression).

TRex

Catalyst switches allow you to configure several descriptive system parameters to ease in the administration of internetworking equipment. The ability to document and identify networking equipment will make it easier for network administrators to manage and maintain their network. There are two ways that system information can be viewed or used.

Configuring System Information on Catalyst Switches - Cisco

This article covers basic and advanced configuration of Cisco Catalyst Layer 3 switches such as the Cisco Catalyst 3560G, 3560E, 3560-X, 3750, 3750E, 3750-X, 3850 and 4500 series, and extends to include the configuration of additional features considered important to the secure and correct operation of these devices.

Basic & Advanced Catalyst Layer 3 Switch Configuration ...

This article explains the Errdisable feature on Cisco Catalyst switches. Learn why and how ports are automatically disabled/shutdown, how to configure the Catalyst switches for autorecovery from err-disable states and selectively disable Errdisable feature for different reasons.

Err-disabled Port State, Enable & Disable Autorecovery Feature

Most Cisco phones support the ability to set the background image of the display. This is great for a company image campaign or corporate branding however, Cisco only provides a manual method to set the background image at the phone.

Deploy Background Images to Cisco UC Phone Handsets ...

The GLC-SX-MMD 1000BASE-SX SFP is made for Multimode Fiber only. The 1000BASE-SX SFP, compatible with the IEEE 802.3z 1000BASE-SX standard, operates on legacy 50 μm multimode fiber links up to 550 m and on 62.5 μm Fiber Distributed Data Interface (FDDI)-grade multimode fibers up to 220 m.
